

AI Your Team Can Use Control Your Business Can Trust

AI is already inside your business.
Is usage happening in a secure environment?

Employees are using commercial AI platforms in everyday work tasks. Risk happens without visibility, governance, or controlled protection.

THE PROBLEM

Uncontrolled AI usage creates real business risk.

Shadow AI Usage

Employees use public AI tools without oversight.

No Audit Visibility

You do not know what tools are being used or how.

No Policy Control

Proper AI Governance is currently nonexistent.

Disconnected Data

Generic answers instead of insights from your data.

Data Exposure Risk

Sensitive info may be shared on public platforms.

THE SOLUTION

Support for a private, governed AI environment.

Private and Secure

Encrypted environment with DLP protection.

Visibility and Control

See how AI is used with audit logs and admin controls.

Governed AI Usage

Enforce policies, control access, and protect data.

Connected Intelligence

Answers from company docs, knowledge, and live data.

Ready for Business

Easy for employees to use and easy for IT to trust!

How Does Secure Chat Make All This Possible?

Secure Chat helps businesses embrace AI securely through a centralized, private AI environment where employees can work faster, and leadership maintains visibility, control, and protection over sensitive company data. Built with enterprise-grade security, audit visibility, DLP protection, and intelligent business system connectivity, this was designed to support secure AI adoption at scale.

Work Smarter. Stay In Control.

Give your employees the freedom to use AI confidently while providing leadership the visibility, governance, and protection every business needs.

One Secure AI Platform for Your Entire Business

Protect Your Business

Keep sensitive company information secure while giving employees access to AI.

Find Answers Faster

Connect AI to documents and systems for more relevant, business-specific responses.

Choose the Right AI

Access leading AI models with one secure platform and use the best tool for each task.

Empower Your Team

Give employees one place to access AI tools without switching between platforms.

Stay in Control

Monitor AI usage, enforce policies, and maintain visibility across your organization.

Automate Everyday Work

Less manual effort by generating reports and content while streamlining routine tasks.

Simple, Predictable Pricing

- ✓ One secure AI workspace
- ✓ Access to leading AI models
- ✓ AI governance & audit visibility
- ✓ Company knowledge integration
- ✓ Business system connectivity

\$40 per user/month

**AI usage billed based on token consumption.*

All the best models. None of the lock-in.

Anthropic, OpenAI, and Google make excellent platforms. Secure Chat is not a replacement for any of them. This is an enhancement built on top of all of them: your prompts run on their models, through one governed platform you control.

The Future Belongs to Organizations That Innovate With Confidence.

AI is changing how businesses work. Give your employees access to the power of AI while gaining the oversight needed to manage it responsibly. A practical approach to improving productivity without compromising trust. Scan the QR code to learn how Secure Chat can empower your team.
